SUMMARY

Data analytics professional with expertise in experimentation design and statistical modeling. Ph.D. research grounded in causal inference and behavioral analytics: empirically studying how digital advertising strategies shape consumer online search behavior using clickstream data, econometric modeling, and machine learning. Built and delivered data products that directly informed product strategy and business decisions across multiple industries. Brings AI tools into the analytics workflow purposefully, while owning the thinking on what the data means and what to do about it.

SKILLS

Technical: Python, R, SQL, Snowflake, Tableau, Power BI, Mixpanel, Azure ML

Methods: Statistical Modeling, Econometrics, Causal Inference, A/B Testing, Machine Learning, Experimentation, Predictive Modeling, Clickstream & Behavioral Analytics

AI Tools: Claude Code, Gemini in Colab, NotebookLM, Copilot, Power BI Copilot – used to generate SQL from natural language, automate coding tasks, data cleaning, visualization, and research synthesis; I review, adapt, and validate all output, and retain full ownership of framing the questions, interpreting findings, and drawing recommendations

PROFESSIONAL EXPERIENCE

Imagine Learning | Research Analyst – Analytics, Reporting, and Experimentation | May 2023 – Nov 2025

- Designed and executed a full A/B experiment to help the Product team evaluate UI variations; identified a winning variant that drove measurable lift in feature discovery.
- Owned end-to-end analysis of user engagement across multiple U.S. states, measuring how product usage relates to benchmark performance; wrote SQL queries in Snowflake and conducted statistical analysis in R and Python.
- Built product usage reports (ad-hoc and recurring) and Power BI dashboards, translating complex usage patterns into retention and success strategies.
- Established an AI-enhanced analytics workflow: using AI tools to generate SQL from natural language descriptions and automate coding tasks, including data cleaning and visualization, while I retain full ownership of framing the questions, interpreting findings, and drawing recommendations.

University of California - Irvine | Ph.D. Researcher | Sep 2013 – Mar 2021

- Conducted dissertation research on consumer online search behavior on large-scale, individual-level clickstream data; used causal inference techniques to measure the impact of different advertising strategies on user search behavior and re-engagement patterns.
- Expanded the research to multi-device consumer journeys, measuring how sequences of desktop and mobile interactions influence purchase conversion: findings relevant to digital attribution and cross-device analytics.
- Built instructional content and knowledge bases; supervised data science projects using SQL, R, Python, Tableau, and Azure Machine Learning. Delivered graduate-level instruction in MS Business Analytics and MBA programs: Machine Learning for Analytics, Digital Platforms, and Research Design.

IBM | Consultant – Global Business Analytics | Nov 2012 – Jul 2013

- Partnered with a banking client to analyze and re-engineer batch processing workflows; applied process optimization and quantitative analysis to reduce turnaround time and increase system throughput.

EDUCATION

University of California - Irvine, CA

Ph.D., Management Information Systems | Dissertation: Consumer Online Search Behavior: An Empirical Analysis

University of Michigan - Ann Arbor, MI

M.S., Industrial and Operations Engineering | Fulbright Scholar | Focus: Optimization, Statistical Modeling, Decision Science

Keio University, Japan

MS, Electrical Engineering

Keio Scholar | Thesis: Cognitive Radio System with Carrier Sense Assisted by Cellular System

Thammasat University, Thailand

BE, Electrical Engineering

First Class Honors, Gold Medalist | Thesis: Using the Least-Mean-Square Algorithm to Improve Adaptive Signal-to-Interference Ratio Estimators

HONORS & AWARDS

Fulbright Scholarship | Keio Scholarship (Thailand's representative) | Thammasat University Gold Medal (highest GPA in Electrical Engineering) | Engineering Institute of Thailand Outstanding Achievement Award | Siam Cement Group Talent Scholarship | Thammasat University Academic Excellence Awards | First-Year Honors | Sirindhorn International Institute of Technology Scholarship | King Bhumibol Scholarship (highest national examination scores in Engineering)
